

PLEASE CAREFULLY READ THE INSTRUCTIONS AS THE MEASUREMENT MAY NOT BE ACCURATE IF NOT DONE PROPERLY.

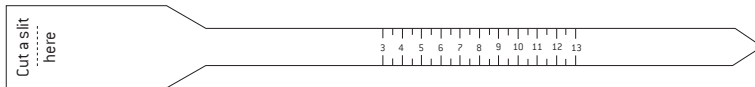

CONFIRM PRINTED PAPER SIZE

1. Prior to printing, ensure that page scaling is set to "none" on your print dialog box.
2. Measure the bar on the left to ensure it is exactly 2 inches or 50 mm long.
3. If measurement is not accurate, check that you are printing the page at full size and reprint before continuing.

METHOD A MEASURE FINGER WITH PAPER RING SIZE

1. Using scissors, carefully cut along the perimeter of the ring sizer.
2. Make a small incision at the wide end of the ring sizer where indicated.
3. Wrap the ring sizer around the respective finger with the numbers facing outward.
4. Slide the narrow, pointed end through the slit.
5. Move the ring sizer to the widest part of your finger (this may be your knuckle).
6. Pull tightly, but not so tight as to rip the paper. A snug fit is required to get an accurate measurement of your ring size.
7. The number that lines up with the slit is your ring size.

NOTES FOR ACCURATE MEASURING

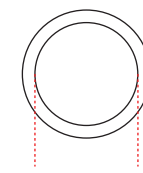

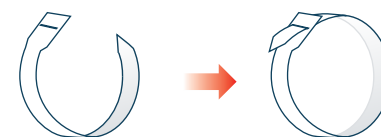

- Avoid measuring cold fingers as this is when fingers are at their smallest.
- Measure your finger when it is at its largest, at the end of the day.

METHOD B MEASURE USING EXISTING RING

1. Choose a ring that properly fits the respective finger. The traditional "ring finger" is located between the middle finger and the little finger. Engagement and Wedding rings are usually worn on the "ring finger".
2. Place the existing ring over the circles at the bottom of this page. Match your ring to the circle closest in size. This is the measurement for the diameter of the ring.
3. If your existing ring measurement falls between two of the circles, choose the larger size.
